DETAILED ACTION

This is a restriction requirement in response to application 10/058,638 filed on January 28, 2002, in which claims 1-31 are presented for examination.

5

Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-25;

II. Claims 26-31.

10 Inventions I and II are related as disclosed, but distinct as claimed (MPEP § 806).
In the instant case, invention I is drawn to the design of a pixel sensor within an imaging array. Whereas, invention II is drawn to a method for displaying interlaced video images.

15 Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

20 The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the
5 inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
